SEAMETRICS INC. WELCOMES PAUL EATON AS DIRECTOR OF SALES & MARKETING

KENT, WA – Seametrics Inc. is pleased to introduce **Paul Eaton** as **Director of Sales & Marketing**. Paul has been with INW, a leading manufacturer of water instrumentation, datalogging and telemetry equipment, for the last five years as VP of Sales and Marketing. Paul was formerly a field services manager for a storm water filtration manufacturer, and has experience in the precast concrete industry. He brings a wealth of knowledge in product and sales process improvements that will complement and refine Seametrics' offerings.

Paul received his BA in Management and Organization from Central Washington University.

About Seametrics

Seametrics Inc. is a designer and manufacturer of a wide variety of flow metering products. Since 1990 the company has provided innovative solutions to users in industrial water treatment, energy management, irrigation, utilities, transportation, and chemical handling. Seametrics products have a reputation for durability and accuracy at a competitive price, and are sold largely through a network of domestic and international distributors.

The location just south of Seattle Washington is home to both the engineering and production groups. Seametrics employs just-in-time manufacturing methods and has a high commitment to continuous improvement. The company follows its ISO 9001 quality management system and employs lean design principles. A focus on innovation, product value and customer accessibility has resulted in two decades of continuous growth. Seametrics is dedicated to providing our customers with products that help in many different ways to make the world a better place.
