### Guidelines

- AG3000 meters, effective November 1, 2017, will include a 5-year product warranty
- Battery replacement program:
  - When the product is used with the standard factory settings, the original battery should last 5 years
  - One free battery replacement will be sent if the customer calls in and requests one at, or near, the 5-year change period
- Rebuilt products will receive a new two-year warranty
- Products returned within the warranty period, and within 2 years of release, will be inspected at no charge for cause of failure. If failure is due to misuse or misapplication and not covered by the warranty, an inspection fee will be charged
- All other products returned within the warranty period will be replaced without inspection
- Products returned within the warranty period a second time, will be inspected for cause of failure before repairing, crediting or sending another unit
- Warranty freight: Seametrics pays both ways. If no problem is found, customer will be responsible for return freight
- Non-warranty freight: Customer pays both ways. PO needs to be issued at the time the RMA is set up for non-warranty work
- **Products must be cleaned before return. Products not cleaned will be assessed a minimum \$100 cleaning fee. Cleaning applies to products involving dirt, slurries or other non-hazardous material or fluids. Products involving hazardous or unknown fluids must also include an SDS. For employee safety, products involving hazardous or unknown fluids, and not cleaned or accompanied by an SDS, will be returned**
- If customer decides to rebuild the product, after the inspection, the inspection cost will be credited to the rebuild
- If customer decides to buy new, after the inspection, the inspection cost will be applied to the new meter purchase
- **All prices are net to Seametrics.**
- **Products will be returned after 10 business days of the inspection, if we do not get a response on how to proceed. Inspection fee will still be charged.**
- Flanged meters prior to 2013 cannot be recalibrated due to bench changes.
