

Agricultural Irrigation

FLANGED MAGMETER

AG3000 Series

2" - 12" Sizes
External or Battery Powered
2:1 Straight Pipe
Pulse or 4-20mA Output
IP68 (Direct Burial & Submersion)

Minimal straight pipe requirements allow these meters to be used where there is little installation space. Unobstructed flow and no moving parts reduce maintenance costs.

BATTERY POWER INSERTION

AG90

4"-12" Pipe Sizes
Easy to Install
4 Year Battery Life
No Moving Parts

The AG90 is a battery powered, insertion mag designed to easily replace a mechanical propeller meter or for new installations. With no moving parts, they are low maintenance and easy to install.

PLASTIC MAGMETER

WMP Series

1" - 3" Sizes
External or Battery Powered
2:1 Straight Pipe
Corrosion Resistant

Great for small irrigation pipe, the polypropylene flow tube also offers corrosion resistance to a wide range of fertilizers and chemicals.

LOW-FLOW MAGMETER

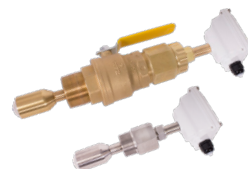

PE202

1/4" - 3/4" Sizes
Corrosion & Fertilizer Resistant
No Straight Pipe Requirement
Pulse or 4-20mA Output

The PE102 is ideally designed for low-flow chemical and fertigation injection and difficult applications with pulsating metering pumps.

INSERTION MAGMETER

EX100/200 Series

3" - 48" Adjustable depth
Stainless Steel or Brass
Externally Powered
Hot Tap Available

Easy to install, these meters withstand a variety of temperature, pressure and poor water conditions. With no moving parts, these meters are low maintenance and fit a variety of pipe sizes and types.

FLOW RATE & TOTAL

FT400 Series

6 digit rate; 8 digit total
Flow alarm
Multiple outputs

Flow rate & totalizing display can be remote, meter or panel mounted. Can be external or battery powered, depending on meter model and includes a variety of outputs.
