

## Insertion Meters

### BATTERY POWERED INSERTION MAGMETER

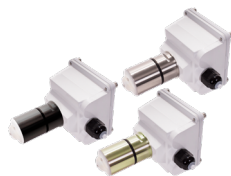

#### EX90

4"-12" Pipe Sizes  
4 Year Battery Life  
No Moving Parts

Available in Saddle or Weld-o-let models

The EX90 is a battery powered, insertion mag designed for difficult applications where no power is available. With no moving parts, they are low maintenance and easy to install.

### FIXED MAGMETER

#### EX800 Series

1" - 12" Pipe Sizes  
Externally Powered  
PVC, Brass or Stainless  
No Moving Parts

A choice of materials allows the meter to adapt to a range of temperature, pressure, and corrosive environments.

### FIXED PADDLEWHEEL

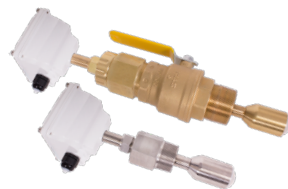

#### IP800 Series

1/2" - 8" Pipe Sizes  
Jewel Bearings  
PVC, Polypro, Brass or Stainless Steel

Bodies are machined from a solid rod for maximum precision. Jewel bearings and nickel-bound tungsten carbide shafts are used for extreme low friction and long life.

### ADJUSTABLE MAGMETER

#### EX100/200 Series

3" - 48" Adjustable depth  
Stainless Steel or Brass  
Externally Powered  
Hot Tap Available

Easy to install, these meters withstand a variety of temperature, pressure and poor water conditions. With no moving parts, these meters are low maintenance and fit a variety of pipe sizes and types.

### ADJUSTABLE PADDLEWHEEL

#### IP100/200

3" - 40" Pipe Sizes  
Jewel Bearings  
PVC, Brass or Stainless  
Hot Tap Available

Ruby bearings and a non-drag Hall-effect sensor give these meters the widest flow range of any paddlewheels on the market.
