

GDL

4-20mA DATA LOGGER

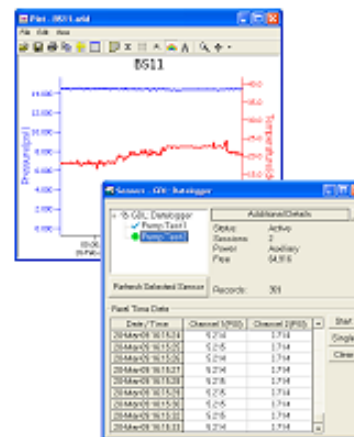

APPLICATIONS

- Stormwater discharge monitoring
- Water quality monitoring
- Irrigation control
- Stream gauging
- Wetland monitoring
- Well, tank, tidal levels

Features

- Two 4-20mA channels
- Over 65,000 records in non-volatile memory
- Network with other Seametrics Smart Sensors
- Wireless connectivity
- Internal 12 Vdc power supply—AA pack runs data logger and powers 4-20mA loop
- External power supplies available for data intensive or long-term data logging needs
- Programmable warm-up time—easily set the required warm-up time for your particular equipment
- Readings displayed in mA, μ A, or user defined units—display your data in psi, feet of water, or any unit of your choosing
- SDI-12 v1.3 and Modbus[®] RTU

Free Aqua4Plus Software

- Set flexible recording sequences
- Retrieve data
- Monitor real time data
- View collected data—tables & graphs
- Export to spreadsheets and databases
